

Steven Moczygemba

Office IT Support, Front & Back-End Web Developer, Graphic Designer, and Automation/Lead Gen Technician

I am a Front & Back-End Web Developer and am university-trained in programming. My 20+ years of experience is defined by technical versatility and an innovative mindset. I excel in custom and secure WordPress development, specializing in high-performance, SEO-optimized websites and CMS platforms that drive business growth.

My broad technical background allows me to build everything from complex web applications to automated sales systems. I'm comfortable working across the entire stack, including VoIP programming, API integrations, and call center automation, amongst many other types of custom tailored automations. My diverse skillset in IT and Design has given me a good eye at spotting things that could be innovated on and improved, as well as spotting technical gaps that were overlooked. I enjoy taking projects from a rough concept and leading them through to a finished, high-performing product.

Studied Computer Science
Texas State University
- 2006-2007
Associates - Graphic Design
San Antonio College

Experience

2009-Present

Self-Employed | San Antonio, TX

Web Developer, Graphic Designer & Tech Consultant

I am a Front & Back-End Web Developer & an experienced Graphic Designer who is also university trained in programming. My 20+ years of experience is defined by technical versatility and an innovative mindset. I mainly use WordPress and the Elementor web builder now, with SEO that optimizes for organic SEO Growth. I have been creating websites since 2003. Now I also specialize in CMS platforms that utilize my customized automation to drive business growth, often filling in any unknown technical gaps that end up growing the scale and increasing productivity of businesses. I am looking for work that utilizes any of these skillsets.

2025-2025 (6m contract job)

SYBIS Computer Technology | San Antonio, TX

Web Developer and IT Engineer

Developed and maintained custom, secure WordPress websites by integrating high-end graphic design and UI/UX best practices with expert-level technical support. This role included branding, rebuilding websites and their backends, managing network architecture, deploying hardware in hospital environments, and implementing innovative digital integrations to ensure all solutions were visually aligned with client branding and technically optimized for SYBIS and its contracted partners.

2024 - 2025

UpQuark Technology Solutions | San Antonio, TX

Owner - Technical Project Lead

I created this company with the owner of Voyage Insurance while working at their office as Technical Project Lead. I built the entire business from the ground up, including the brand identity and the upquarktech.com website. As the lead developer, I was responsible for the end-to-end design and coding of custom web applications and automated sales systems for my clients. I successfully managed all operations until the company was sold in late 2025.

2023 - 2025

Voyage Insurance Group | San Antonio, TX

Technical Project Lead

I did many things here including, Web & Graphic Design, Marketing, SEO optimization, Automation, Lead Generation, and Microsoft 365 Administration. I created a system that uses the Meta Facebook Pixel, Zapier, Microsoft Teams, and the custom CMS platform that Voyage used to create an automated lead capture system that send leads to the sales team on Teams, sent an email out to the customer, and much more.

2019 - 2020

Mariott Rivercenter | San Antonio, TX

Front Desk Concierge Manager

I served as the face of the hotel, handling everything from guest check-ins to front-of-house operations. My role involved significant responsibility, including managing nightly bank drops and mastering the hotel's proprietary software systems. Based on my performance, I was promoted into the management training program to lead the concierge team, a role I held until the pandemic-related layoffs in early 2020.

2018 to 2019 (1y Contract job)

San Antonio College | San Antonio, TX

Lead Graphic Designer

Did all of the graphic design for the school, including digital TV ads that were displayed throughout the campus. I did their ads and event art (Maps for events, signage, letterheads, etc.) I worked with different clubs making their advertisements and did many more graphic jobs.
